Abstracts

Global Military Battery Market is valued at approximately XX in 2021 and is anticipated to grow with a healthy growth rate of more than xx% over the forecast period 2022-2028. Batteries are used by the military to power a wide range of devices, from power tools to military portable equipment. Lithium-ion batteries have proven to be the most reliable power source for portable electronics on the military battlefield. The rising usage of lightweight and high-power density batteries in advanced military equipment is driving the military battery sector. The expanding usage of sophisticated technologies such as air defence systems and electronic warfare systems by defence forces is boosting the demand for lightweight and high-power density military batteries around the world. Key players are making product launches to gain significant market share. For instance, C&L Aerospace inked a distribution deal with Concorde in January 2022 for the distribution of ERJ 135/145 sealed lead-acid (SLA) batteries. Lincad was awarded a contract by Thales Group to provide SquadNet batteries in November 2021. The batteries will power Thale's leading networking army radios. EaglePicher was awarded an IARPA contract in October 2021 to explore novel battery technology. The contract will cover the development of sulfur-based batteries with high energy density and long life. Defense forces' increased deployment of Unmanned Aerial Vehicles (UAVs) and man-portable gadgets, among other things, has spurred demand for lightweight, high power, and long endurance batteries, as these batteries lead to a

reduction in overall system size. However, the global Military Battery Market Size could be impacted by charging concerns with rechargeable military batteries. Furthermore, the safety and regulatory difficulties associated with the usage of lead-acid military batteries may be one of the key impediments to the global industry. Advancements in material sciences and battery technology is expected to create growth opportunity for the market over the forecast period.

The key regions considered for the global Military Battery market study include Asia Pacific, North America, Europe, Latin America, and Rest of the World. Europe is dominating the military battery market. Various military battery manufacturers, including Saft (Total), BAE Systems, and ECOBAT Battery Technologies, have manufacturing facilities in Europe. The existence of the defence manufacturing industry, expanding demand for defence platforms around the world, and continuous upgrade programmes for current defence systems have all contributed to an increase in demand for military batteries in Europe.
