## **Abstracts**

Global Military Trainer Aircraft Market is valued approximately at USD XX billion in 2020 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2021-2027. Trainer is a type of aircraft which is designed to provide flight training to the pilots and aircrews. These trainer aircraft are equipped with additional features which include simplified cockpit arrangement, tandem flight controls and forgiving flight characteristics among other safety features. The Military Trainer Aircraft market is being driven by rising need of replacing aging fleets, rising arms forces among economies and others. Moreover, the ability to carry heavy war loads further ignite the market. In addition, at the time of high intensity wars, these trainer aircrafts can also be used to operate within a framework of other properties. For instance, the French Dassault and German Alpha Jets are used for light strikes and anti-shiping roles while being protected by other aircrafts using machine guns. However, adoption of UAVs may impede market growth over the forecast period of 2021-2027.

The regional analysis of the Military Trainer Aircraft Market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is a significant region across the world in terms of market share due to investing more on military training in order to keep their defense strong owing to the rising terrorist activities globally. Whereas Asia Pacific is also anticipated to exhibit

the highest CAGR over the forecast period 2021-2027 due to gradually upgrading defense capability in the region.
