## **Abstracts**

Global Missile Seekers Market is valued approximately USD 5.04 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 5.20 % over the forecast period 2021-2027. Missile is a weapon or an object which is thrown or projected to strike something which is at distance. These Missiles can also be guided to something with the help of Infrared homing which is a weapon guiding system that tracks or follows a target using Infrared light emissions. Infrared-seeking missiles are commonly referred to as heat-seekers, since heated bodies emit a lot of Infrared radiations. The increasing conflicts and war like situations between countries will drive the demand and technological advancement in Missile Seeker Market. Presently, the world is witnessing Afghanistan war, US-China dispute, India-Pakistan dispute and North Korea issue. The changing nature of warfare will drive the market. For instance, in the Indian Military's surgical strike, done in response to Pulwama Attack, Indian Airforce used guided missiles to destroy a terrorist camp in Balakot Pakistan. According to Stockholm International Peace Research Institute (SIPRI), the global military spending rises to approximately \$2 trillion in 2020. The technology advancement has now developed missiles which can even hit moving targets. However, government regulations on the usage of missile impedes the growth of the market over the forecast period of 2021-2027. Also, with the decrease in stock of precision guided missiles is likely to increase the market growth during the forecast period.

The regional analysis of global Missile Seekers Market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the significant region across the world in terms of market share owing to the growing spending on military equipment and adoption of advanced systems for missile seekers. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate over the forecast period 2021-2027. Factors such as growing demand for missiles by developing countries, and technological advancements would create lucrative growth prospects for the Missile Seekers Market across Asia-Pacific region.
