Abstracts

Global Mission Management System Market is valued at approximately USD 27.50 billion in 2022 and is anticipated to grow with a healthy growth rate of more than 11.95% over the forecast period 2023-2030. A Mission Management System is a comprehensive software platform or set of tools used to plan, coordinate, and monitor missions or operations in various domains such as military, aviation, space exploration, emergency response, and more. It provides a centralized hub for managing mission-related activities and resources, enabling efficient collaboration, decision-making, and situational awareness. The Mission Management System market is expanding because of factors such as increasing defense spending and growing number of Military drones. The Mission Management System allows users to create, modify, and visualize mission plans, including objectives, routes, waypoints, schedules, and allocation of resources. It may include tools for 3D visualization, geographic information systems and simulation. Its importance has progressively increased during the last few decades.

According to Statista, the United States lead the ranking of countries with the largest military spending in 2021 around USD 801 billion allocated to the military. That accounted for 38% of overall global military spending that year, which accounts for USD 2.1 trillion. Another important component driving space increase is the number of Military drones. As per Statista, in 2020, the commercial drone market generates

around USD 2.4 billion in global revenue. In addition, in 2022 the ranking by revenue in the drone segment of the consumer electronics market is led by China with USD 1.25 billion, followed by the United States with USD 1.22 billion. Also, increasing demand for UAVs in defense missions and rising territorial and border disputes would create a lucrative growth prospectus for the market over the forecast period. However, absence of structured data related to mission stifles market growth throughout the forecast period of 2023-2030.

The key regions considered for the Global Mission Management System Market study include Asia Pacific, North America, Europe, Latin America, and Middle East & Africa. North America dominated the market in 2022 owing to the presence of key market players from aerospace and defense industry. Asia Pacific is expected to grow significantly during the forecast period, owing to factors such as rising cross-border disputes and rising government initiatives in the technological development of defense intelligence solutions in the region.

Major market players included in this report are:

Lockheed Martin

Neya Systems

Saab Group

Northrop Grumman

Quinetiq Group

Thales Group

Curtiss-Wright

Recent Developments in the Market:

In September 2022, Northrop Grumman Corp. battle management experts are preparing to help military officials in dealing with ambiguous information about probable air and missile attacks. US Army Contracting Command officials at Redstone Arsenal, Ala., announced earlier an \$24.1 million order to the Northrop Grumman Mission Systems segment in Huntsville, Ala., for hardware and software for the Integrated Battle Command System.
