Abstracts

Global Missouri Medical Cannabis Market is valued at approximately USDXX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2028. Missouri medical cannabis is also known as marijuana, which is any strain of cannabis with a tetrahydrocannabinol (THC) content of more than 0.3% on a dry weight basis. This cannabis is a psychoactive drug that is used for medical or recreational purposes. The increasing number of research activities about the advantages of cannabis-based products on human health, the rise in prevalence of various chronic diseases such as cancer, chronic pain, arthritis, diabetes, aids, and others, coupled with the growing number of product launches are propelling the global market growth. For instance, according to the International Diabetic Federation (IDF), in 2019, nearly 463 million adults (20-79 years) were recorded as diabetes patients. Also, the amount is anticipated to reach around 700 million by 2045. Consequentially, the rising incidences of diabetes are surging the demand for Missouri medical cannabis, which leads the market growth around the world. However, unauthorized use of marijuana for recreational purposes may stifle the growth of the market over the forecast period of 2022-2028. Also, the rising acceptance of Missouri medical cannabis in healthcare applications and growing investment in R&D activities are anticipated to act as catalyzing factors for the market demand during the forecast period.

The key regions considered for the global Missouri Medical Cannabis Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to the rising expenditure in R&D activities, along with the increasing incidences of target

diseases. Whereas, Asia-Pacific is anticipated to exhibit the highest CAGR over the forecast period 2022-2028. Factors such as the growth of pharmaceutical sector, as well as increasing usage of Missouri medical cannabis in healthcare applications, would create lucrative growth prospects for the Missouri Medical Cannabis Market across the Asia-Pacific region.
