Abstracts

Global Mobile Crushers and Screeners Market is valued approximately USD 2.5 billion in 2019 and is anticipated to grow with a healthy growth rate of more than 3.7 % over the forecast period 2020-2027. Mobile crushers & screeners are designed and used for the crushing, aggregation, recycling, and processing of mining rocks among other activities. Mobile crushers & screeners help convert large solid masses into smaller components so they can be easily handled or further processed for adding value. Growth in infrastructure development projects such as dams, railway ballast, airports, expressways, and national highways and construction industries drives the global mobile crushers and screener market. In addition, the crushing and screening process with mobile equipment helps to reduce the cost of transporting materials. the main factor driving the market. For instance: According to Statista, in 2018, the construction industry spending worldwide amounted to 11.4 trillion U.S. dollars as compare to 10.9 trillion U.S dollars in 2017. However, Crushing and screening industries face infrastructure problems such as power shortages, improper roads, rail and airport links, which restrict the growth of the market. Moreover, the majority of the equipment currently used function on diesel, which releases high carbon emissions and imposes stricter carbon regulations poses a major challenge to the growth of the market for mobile crushers and screeners.

The regional analysis of global Mobile Crushers and Screeners Market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading/significant region across the world in terms of

low transportation cost. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2020-2027. Factors such as Rise of construction industries, urbanization due to increase in population would create lucrative growth prospects for the Mobile Crushers and Screeners Market across Asia-Pacific region.
