Abstracts

Global Mobile Games Market is valued approximately at USD 62.2 billion in 2018 and is anticipated to grow with a healthy growth rate of more than 11.5% over the forecast period 2019-2026. A mobile game is a game played on a smartphone/tablet, feature phone, personal digital assistant (PDA), portable media player, smartwatch or graphic calculator. Recently, mobile games are typically downloaded from mobile operator's portal as well as from an app store. But in some cases, mobile games are preloaded in the handheld devices by the original equipment manufacturer (OEM) or by the mobile operator when bought, through infrared connection, Bluetooth, or memory card. Growing proliferation of smartphones and tablets, shift consumer preference from computer games to smartphone games, along with increasing availability of a diverse range of gaming genres are the few factor responsible for high CAGR of the market over the forecast period. For instance, as per Pew Research it was estimated that more than 5 billion people has mobile devices in 2016 globally. Moreover, as per the study of Statista, user penetration in consumer electronics is around 23.7% in 2019 and is expected to reach 33.5% by 2023. This in turn is projected to augment the demand for Mobile Games across the world. However, Low monetization rate of players is the major factor challenging the growth of global mobile games market during the forecast period.

The regional analysis of global Mobile Games Market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. Asia-pacific is the leading/significant region across the world in terms of market share owing to growing preference towards mobile gaming among children and rising number of

smartphone users in the region. However, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period of 2019-2026.
