Abstracts

Global Modular Chillers Market is valued approximately at USD 2.5 billion in 2018 and is anticipated to grow with a healthy growth rate of more than 6% over the forecast period 2019-2026. Modular chiller is used to cool the brine and water and to dehumidify the air in industrial processes and buildings. Modular chillers are capable of this cooling by using the evaporator and also have an installed internal or remote condenser with appropriate controls. The modular chillers have gained popularity due to its wide range of applications from space cooling to process purposes. Growing number of commercial construction projects and advantages of chillers over traditional chillers are key driving factors of the market growth. Further, growing industrial application is expected to create significant growth opportunity in the market over the forecast period. However, high setup cost of modular chillers is expected to hamper the market growth over the forecast period of 2019-2026.

The regional analysis of global Modular Chillers market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. Asia Pacific is the leading region across the world. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2019-2026. Factors such as presence of huge HVAC and construction industries would create lucrative growth prospects for the Modular Chillers market across Asia-Pacific region.
