## **Abstracts**

Global Motorcycle Infotainment Market is valued approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2029. Motorcycle Infotainment is an electronic system utilized to deliver entertainment and information to the driver and the passengers through audio & video interfaces. A motorcycle infotainment system consists of digital display, sensors, connectivity modules such as Apple Car play etc. The motorcycle infotainment system also features navigation services to guide the rider during the riding. The rising expansion of global Motorbike Market and increasing adoption of connected motorcycles worldwide as well as strategic initiatives from leading market players are key factors accelerating the market growth.

According to Statista – during 2021, the global market for electric motorcycle was estimated at USD 46 billion, and as per projections the market would reach to USD 1095 billion by 2030. Also, increasing number of safety compliances from government authorities and rising electrification of motorcycles would create lucrative growth prospectus for the market over the forecast period. However, slow penetration of premium bike in developing regions and volatile cost of raw materials impede the market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Motorcycle Infotainment Market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is the leading region in terms of market share owing to increasing
