Abstracts

Global MRI Contrast Media Agents Market is valued at approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2029. MRI contrast media agents are contrast agents that help in enhancing the visibility of internal body structures in magnetic resonance imaging. There are two types of MRI contrast media agents that are superparamagnetic agents and paramagnetic agents. The increasing geriatric population, growing awareness regarding early diagnosis, coupled with the rising incidence of chronic diseases such as cardiovascular, breast cancer, and neurological diseases are some prominent factors that are leveraging the market growth across the globe.

According to the World Health Organization (WHO) report 2021, there were approximately 17.9 million deaths responsible to cardiovascular diseases in 2019, which shows nearly 32% of all deaths globally. Consequentially, rising cases of cardiovascular diseases act as catalyzing factor for market growth. In addition, growing investment in R&D activities, as well as increasing technological advancement are providing lucrative opportunities for the global market development in the forthcoming years. However, the high cost of MRI contrast media agents and the dearth of skilled professionals stifles market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global MRI Contrast Media Agents Market study

include Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America dominated the space in terms of revenue, owing to the rising incidence of chronic diseases, growing focus on technological innovations, along with growing investment in R&D activities. Whereas, Asia Pacific is expected to grow significantly during the forecast period, owing to factors such as increasing geriatric population, growth of the medical tourism industry, and rising demand for advanced imaging modalities.
