Global MS Polymer Adhesives Market is valued at approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2029. MS polymer adhesives are synthetic bonding agent that includes polymers that are flexible, stronger, and more impact resistant compared to other adhesives. These adhesives are chemicals that help in binding two or more objects together in applications such as automotive & transportation, building & construction, industrial assembly, and many others. Factors such as increasing demand from the automotive industry and the growing use of hybrid resins in the manufacturing sector are the upsurging market demand around the world.

According to the Statista analysis, the worldwide automotive manufacturing sector made over USD 2.5 billion in sales in 2020, and it is anticipated that this figure increase to almost 2.8 billion by 2022. Therefore, the flourishing development of the automotive industry is exhibiting a positive influence on the growth of the MS Polymer Adhesives Market. In addition, increasing investment in R&D activities, along with rising demand for non-hazardous, green, and sustainable adhesives and sealants are creating lucrative opportunities for market growth across the globe. However, lack of acceptance from end-users and limited market opportunities in developed countries are hindering market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global MS Polymer Adhesives Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. Asia

Pacific dominated the market in terms of revenue, owing to the rising demand automotive and aerospace industry, along with the development of the emerging economies such as India and China. Whereas, Europe is expected to grow significantly during the forecast period, owing to factors such as increasing demand from applications such as electronics and biomedical , as well as growing focus on the development of hybrid resins.
