Abstracts

Global MS Polymers Market is expected to reach \$1.95 billion by 2027. Global MS Polymers Market is valued approximately at \$1.3 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 6% over the forecast period 2021-2027. Increased demand for hybrid resins from the manufacturing sector for adhesives and sealants is a major factor driving the market for MS polymers. Also, environmental regulations for the use of isocyanate-free adhesives in several regions such as North America and Europe are also significantly contributing to the market. New product launches by key players are also influencing the market positively. For instance, in March 2021, AGC chemicals launched Fluon+ EM-20010 compounds which are ready-to-use compounds that prevents the growth of bacteria and viruses, according to the company. However, lower acceptance rate from the end-users may stifle the market growth. Still, growing demand for green and sustainable adhesives and sealants will provide lucrative opportunities for the market over the forecasted period.

The Asia Pacific region is expected to exhibit the highest growth rate over the forecasted years. This growth is mainly due to the use of MS polymers in numerous end-use industries including automotive, building and construction, etc.

Major market player included in this report are:

Kaneka

AGC Chemicals

Evonik Industries AG
Momentive
Wacker Chemie AG
Risun Polymer
Sisib Silanes and Silicones
Covestro
Hubei Co-Formula Material Tech
