## **Abstracts**

Global Multi-Cloud Networking in Fintech Market is valued at approximately USD 0.36 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 18.2% over the forecast period 2022-2029. Multi-Cloud Networking refers to the practice of using services from different vendors & providers. This comprises specialised platform-as-a-service, infrastructure-as-a-service, and software-as-a-service providers as well as public cloud service providers like AWS, Google Cloud Platform, or Microsoft Azure. Moreover, Multi-Cloud Networking has the additional benefit of allowing the fintech industry to operate across platforms and apps and to offer clients throughout the world specialised experiences. Additionally, multi-cloud networking in fintech contributes to increased accountability and organizational process simplification. The increasing deployment of cloud applications & services and growing adoption of multi-cloud networking in fintech as well as strategic initiatives from leading market players are key factors accelerating the market growth.

The increasing deployment of cloud applications and services is contributing towards the growth of Global Multi-Cloud Networking in Fintech Market. For instance, - according to Statista - In 2021, the global cloud applications market was valued at USD 133.6 billion, and the market is projected to grow to USD 168.6 billion by 2025. Moreover, as per Statista – as of 2022, revenue in the global Public Cloud market is estimated at USD 397.9 billion, and the revenue is expected to show an annual growth rate (CAGR 2022-2027) of 15.97%, to reach a market volume of USD 834.60 billion by 2027. Also, growing penetration of SMEs in developing regions and rising incidences of

data breaches & theft would create a lucrative growth prospectus for the market over the forecast period. However, dearth of skilled professionals and complexity in redesigning the network stifle market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Multi-Cloud Networking in Fintech Market study include Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America dominated the market in terms of revenue, owing to the dominance of leading Cloud Service Providers (CSPs), and availability of required technological infrastructure in the region. Whereas Asia Pacific is expected to grow with the highest CAGR during the forecast period, owing to factors such as rising expansion of Fintech industry and increasing penetration of leading cloud services vendors in the region.
