Abstracts

Global Multi-Grain Premixes Market is valued approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Multi-Grain Premixes refers to concentrated mixture of different seeds and grains and can be used to bake a wide range of bakery products such as multigrain breads, rolls and buns among others. Growing demand for plant-based bakery products and increasing awareness with respect to healthy eating as well as surging number of caf?s are key drivers for growth of Multi-Grain Premixes Market. For instance, according to Statista - In 2020, sales of plant-based bakery and confectionery in Europe was valued at USD 333 million, and this amount is projected to grow to USD 605 million by end of 2026. Furthermore, as per Statista - in 2020, the global full-service restaurant industry was estimated at USD 1.2 trillion, and as per projections the industry is projected to reach to USD 1.7 trillion by end of 2027. Also, growing consumption of bakery products and rising incidences of gluten intolerance among consumers are anticipated to act as a catalyzing factor for the market demand during the forecast period. However, high cost associated with multigrain premix impedes the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Multi-Grain Premixes Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to the growing consumption of plant-based bakery products and rising trend of veganism in the region. Whereas, Asia Pacific is anticipated to exhibit a significant growth rate over the forecast period 2022-2028. Factors such as growing food and beverages sector and

increasing penetration of caf? culture in the region, would create lucrative growth prospects for the Multi-Grain Premixes Market across the Asia Pacific region.
