Abstracts

Global Multilayer Flexible Packaging Market is valued approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Multilayer food packaging solutions refers to tailored packaging solutions which carries properties of diverse materials, combined together into one packaging solution. Flexible packaging like pouches, bags, lidding and rigid packaging such as trays, cups, and bottles consist of variable material, combined in layers. Through the approach to combine materials, these packaging solutions offer technical and systemic strengths. Growing Food & Beverages industry and rising Merger & Acquisition and new product launches are key drivers for the growth of Multilayer Flexible Packaging market. For instance, according to The Good Food Institute (GFI) and the Plant Based Foods Association (PBFA)- in 2020, the total plant-based market in US valued at USD 7 billion, witnessing growth rate of over 27% from USD 5.5 billion in USA. In 2020, 57 percent of all U.S. households purchased plant-based foods (Over 71 million households)- up from 53 percent in 2019.

Also, in recent events in October 2021 C-P flexible Packaging Pennsylvania, US based Packaging and Containers Manufacturer has acquired Norcross, Georgia based Preferred Packaging manufacturer of multilayer flexible films and in September 2021 HKScan, Finnish manufacturer of meat foods and products collaborated with Woodly and Wipak to develop wood-based plastic packaging for its grilled sausage series. Also, with the increasing penetration of ready-to-eat food products in emerging economies and growing trend of online retailing, the adoption & demand for Multilayer Flexible Packaging is likely to increase the market growth during the forecast period. However, negative impact of covid 19 pandemic on end use industries and rising consciousness over plastic use are some of the factors which can impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Multilayer Flexible Packaging Market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is the leading region across the world in terms of market share owing to presence of leading market players in the region. Whereas Asia-Pacific is also anticipated to exhibit highest growth rate over the forecast period 2022-2028. Factors such as increasing demand for ready to eat food products and rising online retailing in the region would create lucrative growth prospects for the Multilayer Flexible Packaging Market across Asia-Pacific region.
