Abstracts

Global Multimodal Transportation Market is valued at approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2029. Multimodal Transportation also known as multimodal shipping refers to the logistics and transportation process that requires multiple modes of transportation to increase efficiency of the overall transportation process. Moreover, a combination of transportation modes is used such as trucks, railways, and ships. These services are maintained and handled by a single carrier called a multimodal transport operator or provider. In addition, multimodal transport uses one transport bill of lading for its services and operation thus, optimizes lead times, and reduces inventory costs. The increasing expansion of cross border e-commerce sector and growing investment from government authorities as well as strategic initiatives from leading market players are key factors accelerating the market growth.

The increasing expansion of cross-border e-commerce trade is contributing to the growth of the Global Multimodal Transport Market. For instance, according to Statista - In 2019, the cross-border online shopping sector was valued at USD 579 billion, and the market is projected to grow to USD 2.25 trillion by 2026. Moreover, in October 2021 the ministry of ports, shipping and waterways announced the formation of a Special Purpose Vehicle (SPV) for development of a Multimodal Logistics Park (MMLP) at VOC Port in Chennai, India. The MMLP would be developed through Public Private Partnership. Also, increase in international trade in cross-border trade coupled with rapid urbanization in developing regions would create a lucrative growth prospectus for

the market over the forecast period. However, cumbersome paperwork, transportation delay and delay caused by lack of coordination associated with Multimodal Transportation stifle market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Multimodal Transportation Market study include Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America dominated the market in terms of revenue, owing to the dominance of leading logistics and transportation service providers and increasing growth of international trade in the region. Whereas Asia Pacific is expected to grow with the highest CAGR during the forecast period, owing to factors such as rising growth of the logistics and transportation sector and increasing government investment in multimodal transportation and logistics hubs in the region.
