Abstracts

Global Multiple Launch Rocket Systems (MLRS) Market is valued at approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. The Multiple Launch Rocket System (MLRS) is a highly mobile automatic system that fires surface-to-surface rockets from the M270 family of launcher weapons platforms. The MLRS Family of Munitions (MLRS MFOM) can be fired in less than one minute by the three-man crew, which was demonstrated very successfully in Operation Desert Storm. The growing territorial disputes and artillery modernization programs have led to the adoption of Multiple Launch Rocket Systems (MLRS) across the forecast period. For Instance: as per the United Nations, most countries on the globe are currently involved in territorial disputes such as India-Pakistan, North Sudan – South Sudan, Indo- China. Also, with the increasing replacement of old systems, the adoption & demand for Multiple Launch Rocket Systems (MLRS) is likely to increase the market growth during the forecast period. However, rocket inaccuracy impedes the growth of the market over the forecast period of 2022-2028.

The key regions considered for the Global Multiple Launch Rocket Systems (MLRS) Market study include Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading region across the world in terms of market share owing to the increasing artillery modernization programs and shifting focus to high mobility, lightweight artillery systems. Whereas, Asia-Pacific is also anticipated to exhibit the highest growth rate over the forecast period 2022-2028. Factors such as rising military budgets and growing disputes between the countries would create lucrative

growth prospects for the Multiple Launch Rocket Systems (MLRS) Market across Asia-Pacific region.
