## **Abstracts**

Global Multivendor ATM Software Market is valued at approximately USD 2.13 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 23.6% over the forecast period 2022-2029. Multivendor ATM software is a computer application intended for banks & credit unions. Multi-Vendor Software (MVS) facilitates and enables financial institutions to streamline their development and support operations without the need to maintain and enhance several numbers of remote delivery infrastructures for each new function or service they provide through their ATM network. Moreover, this solution offers centralization of ATM Channel Management through a single central command control which can be used to enhance the customer experience and deployment of the latest security measures across the ATM service delivery network. The growing adoption of ATMs for banking services and the rising expansion of the banking and financial services industry are key factors accelerating the Market growth.

The increasing preference towards Automated teller machine (ATMs) for seeking banking services is contributing towards the growth of the Global Multivendor ATM Software Market. For instance, according to Statista – in FY 2019, revenue from ATM transactions across India was estimated at USD 840 million, and this amount is projected to grow to USD 1090 million by FY 2024, and a further USD 1230 million by FY 2026. Moreover, the rising expansion of the banking and financial services industry

is further driving market growth. For instance, as per Statista – as of 2022, revenue in US Banking, Finance & Insurance is estimated at USD 3.72 trillion, and the market is projected to grow at an annual growth rate of 2.47% between 2022 and 2025 to reach USD 4 trillion by end of 2025. Also, the growing integration of new technologies and an increase in the use of advanced analytics for predictive maintenance. However, the high cost of Multivendor ATM software and rising concern about cyber-attacks stifles market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Multivendor ATM Software Market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America dominated the market in terms of revenue, owing to the presence of leading software vendors and the increasing expansion of the banking sector in the region. Whereas Asia Pacific is expected to grow with the highest CAGR during the forecast period, owing to factors such as the rising deployment of digital banking units, and increasing expansion of banking and financial services and the rising emergence of private banking players in the region.
