Abstracts

Global Nanoemulsion Market was valued at USD 2.32 Billion in 2019 and is expected to grow with a CAGR 11.5% over the forecast period 2020-2027. An emulsion is mixed system which consists of minimum one immiscible liquid spread in another liquid in the form of droplets whose diameter surpass 0.1 mm. Nano emulsion technology is used to reduce the deterioration of food caused by air, improve food stability and decrease the evaporation of food scents. There are two liquids in emulsion, oil and water in which oil in water form, oil is in dispersed phase and water is in continuous phase. On the flip side water in oil form, in which water is in dispersed phase and oil in continuous phase. Furthermore, multi emulsion can be possible such as oil in water in oil form and water in oil in water form. Rising trend of Nanostructured food ingredients and additive in food & Beverages and Growing use of Nanoemulsion in food & beverages Industry are key drivers in increasing demand of nanoemulsion market during forecasting years 2020-2027. For instance, as per Development and Incorporation of Nanoemulsions in Food 2019 report, Through antimicrobial activity and the production of the supply of bioactive compounds due to regulated emulsion release, nanoemulsions are engineered to contribute to food safety. Despite that, High cost of Nanoemulsion technology is hinder the growth of market over the forecast period 2020-2027. The regional analysis of the Nanoemulsion Market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World. In which, North America and Europe are dominating the market and remain over the forecasting years owing to increasing Nanoemulsion Industries. However, APAC region is expected to be the fastest growing region over the forecasting period due to nano emulsifiers and food items made using this technology.
