Abstracts

Global Nanomaterials Market is valued approximately at USD 9.52 Billion in 2020 and is anticipated to grow with a healthy growth rate of more than 13.2% over the forecast period 2021-2027. Nanomaterials are the material with any external dimension that are manufactured and used at very small scale. The global Nanomaterial market is being driven by the increasing technological advancement in medical industry, growth in medical diagnostics industry, and increasing penetration of nanotechnology in various applications. Furthermore, the increasing focus on research concerning to nanomaterials and rising government spending on research and development of biotechnology and pharmaceuticals will provide new opportunities for the global Nanomaterial industry. For instance, Hebrew university in 2018 had introduced seed fund of USD 9 million which was launched for supporting research and development on smart materials and nanotechnologies as was conducted by various nanotech companies to focus on quantum science and renewable energy. In 2020, researchers from Korea University and Okinawa Institute of Science and Technology Graduate University developed "Spiral Hydroporator" which is a unique way for delivering particles and chemical compound into cells by membranes which include proteins, DNA, and drugs without causing any vital damage. As a result these new technological

advancement in medical industry will serve as a catalyst for the Nanomaterial industry in the future. However, toxicity assessment of nanomaterials for the commercialization of nanotechnology, may impede market growth over the forecast period of 2021-2027.

The regional analysis of the global Nanomaterials Market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World. Because of fastest growth in semiconductors manufacturing industries with the rising product penetration demand, in terms of market share, Asia Pacific becomes the leading region across the world. Also Europe is anticipated to have the highest growth rate over the forecast period 2021-2027 due to rising investment in technological advancements in the region.
