Abstracts

Global Narcolepsy Treatment Market is valued at approximately USD 4.10 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 5.00 % over the forecast period 2022-2028. Narcolepsy is a chronic neurological disorder that is associated with Excessive Daytime Sleepiness (EDS), hypnagogic hallucinations, cataplexy, sleep paralysis, and fragmented night sleep. It is the brain's inability to control sleep-wake cycles. The high disease burden of sleep-related disorders over the globe and acquisition of biopharmaceutical companies has led to the adoption of Narcolepsy Treatment across the forecast period. For Instance: In January 2020, Axsome Therapeutics, Inc., a clinical-stage biopharmaceutical company developing novel therapies for the management of central nervous system (CNS) disorders, entered into an agreement with Pfizer Inc. for an exclusive U.S. license to Pfizer's clinical and nonclinical data, and intellectual property for reboxetine, the active pharmaceutical ingredient in AXS-12 which Axsome is developing for the treatment of narcolepsy. Also, with the growing research and development activities to find a cure for narcolepsy and narcolepsy awareness programs and services, the adoption & demand for Narcolepsy Treatment is likely to increase the market growth during the forecast period. However, low awareness among patients and adverse effects and risks related to narcolepsy drugs impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the Global Narcolepsy Treatment Market study include Asia Pacific, North America, Europe, Latin America and Rest of the World. North

America is the leading region across the world in terms of market share owing to the advanced healthcare systems in the region and rising efforts by various organizations to spread awareness among the general population. Whereas, Asia-Pacific is also anticipated to exhibit the highest growth rate over the forecast period 2022-2028. Factors such as high prevalence of the disorder and relatively less awareness among the general population in terms of the symptoms associated with narcolepsy would create lucrative growth prospects for the Narcolepsy Treatment market across Asia-Pacific region.
