## Abstracts

Global Neurophotonics Market is valued at approximately USD XXX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2029. Neurophotonics is described as covering optical technologies relevant to the study of neurons and neural activity of the brain and their influence on fundamental and practical applications of neuroscience. Neurophotonic technologies are being used in research, diagnosis, and therapy-based applications. Furthermore, Imaging devices are commonly used in such research and diagnosis, whereas therapy systems are primarily used for biomodulation and neurostimulation. The Neurophotonics market is expanding because of factors such as an increasing number of hospitals and a rise in the unhealthy lifestyle.

In neurology light-based technologies are gaining interest, as they have advantages over other methods such as X-rays, magnetic fields, and radio waves at lower costs, and have long-term safety. Its prevalence has progressively increased during the last few decades. The American Hospital Association conducts an annual survey of hospitals in the United States. In 2020, there are total 6,093 number of hospitals were registered till now. Furthermore, 5,139 were community 1 Hospitals. Another important component driving space increase is an unhealthy lifestyle. According to the World Health Organization, an estimated 600 million, almost 1 in 10 people in the world fall ill after eating contaminated food and around 420 000 die every year. In addition, USD 110 billion is lost each year in medical expenses resulting from unsafe food in low- and middle-income countries. Also, a rise in healthcare expenditures and rising

technological advancements in healthcare devices would create a lucrative growth prospectus for the market over the forecast period. However, the high cost of Neurophotonics stifles market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Neurophotonics Market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America dominated the market in terms of revenue, owing to the rising government initiatives in biotechnology. Furthermore, Asia Pacific is expected to grow with the highest CAGR during the forecast period, owing to factors such as rising geriatric and target populations, and active participation of government and nonprofit organizations in the market space.
