Abstracts

Global Neurorehabilitation Market is valued at approximately USD 1097.69 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 8.3 % over the forecast period 2021-2027. Neurorehabilitation is used in Brain Stroke, Parkinson's Disease, Multiple Sclerosis, Spinal Cord Injury, Traumatic Brain Injury, Cerebral Palsy, and Others. This device is basically used for the treatment of patients with neurological disorders such as in rehabilitation centres, hospitals and clinics. The increasing cases of neurological diseases have led to the adoption of Neurorehabilitation across the forecast period. For Instance: according to the World Health Organization in 2019, the number of neurological diseases is expanding rapidly. WHO states that globally about 264 million people are affected by depression. Bipolar disorders affect about 45 million people globally. 20 million worldwide are affected by schizophrenia. Rising product approvals by regulatory authorities anticipate the growth of Neurorehabilitation Market. Also, with the increasing investment in research and development activities, the adoption & demand for Neurorehabilitation is likely to increase the market growth during the forecast period. However, high device cost impedes the growth of the market over the forecast period of 2021-2027.

The geographical regions considered for the global Neurorehabilitation market analysis includes Asia Pacific, North America, Europe, Latin America and Rest of the World. Europe is deemed as the significant region across the globe in terms of huge market share due to the growing geriatric population and promptness & affordability of neurorehabilitation centers coupled with the well-established healthcare infrastructure and increasing cases of neurological disorders. Whereas, Asia-Pacific is also estimated to attain a maximum growth rate during 2021-2027. Factors such as rising awareness towards neurological disorders, increasing population, rising patient base and improving healthcare infrastructure would create beneficial growth forecasts for the Neurorehabilitation market across Asia-Pacific region.
