Abstracts

Global NICU Catheter market is valued at approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than 5.5% over the forecast period 2022-2028. An intensive care unit (ICU) specializing in the care of sick or premature newborn newborns is known as a neonatal intensive care unit (NICU). Due to the high-risk situations and circumstances during pregnancy, neonatal intensive care unit (NICU) catheter services are in high demand. Infections account for more than half of all neonatal deaths globally. As a result of the increased need for early diagnosis and treatment in hospitals, the number of neonatal intensive care unit (NICU) admissions has increased. These factors are projected to drive growth in the worldwide market for neonatal intensive care unit (NICU) catheters throughout the forecast period. For instance, according to research published by the Centers for Disease Control and Prevention (CDC) in 2018, gestational diabetes affects between 2% and 10% of pregnant women in the United States. The neonatal intensive care unit market will grow due to rising preterm birth rates throughout the world and increased demand for high-quality infant care. Infant respiratory distress syndrome affects around 7% of preterm births, according to a study published in the National Center for Biotechnology Information (NCBI). However, decreasing birth rates in developed countries impedes the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global NICU Catheter market study include Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is the leading region across the world in terms of market share owing to rise in prevalence of premature deliveries and maternal mortality, rising cases of infection. Whereas, Europe is also anticipated to exhibit the highest growth rate over the forecast period 2022-2028. Factors such as technological Advancements in Neonatal Intensive Care Devices would create lucrative growth prospects for the NICU Catheter market across Europe region.
