## **Abstracts**

Global Non-GMO Food Products Market is valued approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Non-GMO or Non-Genetically Modified products are free from the genetically modified organism. The products which are free from GMOs are produced using an organic method or non-organic method. Non-GMO foods are free from chemicals, preservatives, or toxins. Growing demand for natural food products and rising health consciousness among consumers are key drivers for the growth of Non-GMO Food Products market. For instance, according to Plant Based Food Association (PFBA) & Good Food Institute (GFI)- In the year 2021, sales of plant-based food products in US reached to USD 7 billion, witnessing a growth rate of over 27% from that of USD 5.5 billion sales in the year 2020 and Plant-based milk has reached to USD 2.5 billion and accounted for 35% of the total plant-based food market. Also, in Jan 2022, DouxMatok, An Israil based producer of sugar reduction solutions and Blommer Chocolate Co., chocolate manufacturer based in Chicago, Illinois, USA have partnered to produce and sell a portfolio of chocolate products. The companies would develop non-Genetically Modified chocolate-flavored chips with sugar reduced by 50%. Also, with the increasing demand for the non-GMO food label and rising per capita income, the adoption & demand for Non-GMO Food Products is likely to increase the market growth during the forecast period. However, premium pricing of non-GMO food Products and

supply chain disruption due to pandemic restrictions impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Non-GMO Food Products market study includes Asia Pacific, North America, Europe, Latin America and Rest of the World. Asia-Pacific is the leading region across the world in terms of market share owing to increasing demand for the end-use applications in the region. Whereas, Asia-Pacific is anticipated to exhibit highest growth rate over the forecast period 2022-2028. Factors such increasing demand for the product from countries such as India and Japan would create lucrative growth prospects for the Non-GMO Food Products market across Asia-Pacific region.
