Abstracts

Global Non-meat Ingredients Market is valued at approximately USD 36.6 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 4.2% over the forecast period 2022-2028. Non-meat ingredients are primarily adopted to improve meat quality and enhance flavor and color among other functional and textural properties of the meat. These ingredients are generally derived from plant and animal sources. The increasing demand for processed meat products, growing consumption of convenience foods, and rising disposable income are the several factors surging the growth of the global market. For instance, according to Statista, in 2020, the market value of processed meat worldwide was estimated to be worth around USD 523.1 billion. Also, the amount is anticipated to grow and is likely to reach nearly USD 737.2 billion. Consequentially, the rising demand for processed meat products is fueling the demand for non-meat ingredients, which is driving the growth of the market around the world. However, the growing demand for meat substitutes and the increasing vegetarian and vegan population impede the growth of the market over the forecast period of 2022-2028. Also, the increasing investment to develop new product lines and surging demand from fast-food chains are anticipated to act as catalyzing factors for the market demand during the forecast period.

The key regions considered for the global Non-meat Ingredients Market study include

Asia Pacific, North America, Europe, Latin America, and the Rest of the World. Asia-Pacific is the leading region across the world in terms of market share owing to the adoption of the new meat processing technologies, along with the increasing number of working populations. Whereas, North America is anticipated to exhibit the highest CAGR over the forecast period 2022-2028. Factors such as the surging demand for processed and convenience food, as well as, the changing dietary patterns of people, would create lucrative growth prospects for the Non-meat Ingredients Market across the North American region.
