Global Non-UV Dicing Tapes Market is valued approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. The Non-UV Dicing Tapes can be defined as types of dicing tape. The non-UV type uses water instead of UV light to cure adhesive on the surface during the manufacturing process. Non-UV dicing tapes are available in two colors: clear and blue. These films are made with variety of materials such as PVC (Polyvinyl Chloride), PET (Polyethylene Terephthalate), and PO (Polyvinylene copolymer film) among others. Non-UV Films are used in application such as Wafer Dicing, Package Dicing across semiconductor and consumer electronics industries. The growing Consumer durables Industry and increasing demand from end use industries as well as recent expansion initiatives from leading market players are factors that are accelerating the global market demand. For instance, according to Statista – In 2019, Global Consumer Electronics market generated revenue of USD 1,032 billion, and this amount is forecast to rise to USD 1,160 billion by 2025. Furthermore, Companies across the globe are working towards capacity expansion to leverage increasing demand for non-UV dicing tapes. For Instance, In May 2022, Furukawa Electric Co., Ltd. Announced investment of around USD 54 million to increase the production capacity of tape for

Semiconductor Process at the Mie Works site of the company. The production is expected to be increased from April 2025. Also, growing technological advancements in emerging economies and rising applications of semiconductor across different industries are anticipated to act as a catalyzing factor for the market demand during the forecast period. However, Fluctuating prices of raw materials impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Non-UV Dicing Tapes Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to the presence of leading market players and rising application of Non UV dicing tapes across different end use sectors. Whereas, Asia Pacific is anticipated to exhibit a significant growth rate over the forecast period 2022-2028. Factors such as growing demand for electronic components such as semiconductors and printed circuit boards (PCBs) as well as increasing demand for consumer durables in the region, would create lucrative growth prospects for the global Non-UV Dicing Tapes Market across the Asia Pacific region.
