Abstracts

Global Nordic Commercial Printing Market is valued approximately at USD XX billion in 2020 and is anticipated to grow with a healthy growth rate of more than 2.27% over the forecast period 2021-2027. Commercial printing is used in Periodicals, brochures, labels, catalogue, phone book, company forms, training manuals and promotional materials. It consists of paper feed, ink replacer, digital or analogue control panel, fold-out tray, memory card reader, and paper output. It has a wide range of applications in publishing and printing firms, as well as large corporations that use the service to efficiently operate their facilities and operations. The market growth is driven by the key factors such as Rise in demand in the commercial printing papers and Increased Demand for Promotional Materials by the Retail, Food and Beverage Industries. Furthermore, rise in advancement in digital printing. Digital printing encourages various printing houses to adopt new digital printing technologies for fast turnarounds and to attract new customers. For instance, Auro Print has announced to launch an HP 6K digital printing press with a variety of inks including silver, white, yellow, and blue, among others in January 2021. However, Increase in Digitization and Rising Dependence on Feedstock Prices, may impede market growth over the forecast period of 2021-2027.

North America is leading the Nordic Commercial printing market owing to the largest consumption in commercial printing papers but in the coming years the region is expected to face downfall due to the consumer preference for digital media. Whereas, China from APAC region is the global leader in commercial printing paper market which is followed by U.S., Finland and Ireland.
