Global North America Tissue Expander Market to reach USD 853.04 Million by 2025.

Global North America Tissue Expander Market valued approximately USD 352 Million in 2017 is anticipated to grow with a healthy growth rate of more than 11.70 % over the forecast period 2018-2025. The driver for the market is increase in the number of reconstruction surgeries being undertaken and with increasing cases of cosmetic surgical procedures, the tissue expander market is on the rise. The surge in surgical procedures is propelled by several factors like snowballing consciousness of people about their looks, swelling cases of breast cancer, and enhanced utilization of reconstructive surgeries. Scars and damages done by severe accidents would most often require reconstructive surgeries for which tissue expanders are needed. As breast cancer is one of the most prevalent cancers globally, more and more people are opting for procedures like lumpectomy, mastectomy. This is one of the crucial driving factors for the tissue expander market. Though tissue expander market is dominated by its use in breast reconstruction, other cosmetic reconstructions like scalp and forehead skin reconstruction are also enhancing the scope of the tissue expander market further.

The regional analysis of Global North America Tissue Expander Market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America dominated the tissue expanders market with the highest revenue share owing to well-established healthcare infrastructure and growing healthcare expenditure. In addition, according to American Society of Plastic Surgeons,

highest number of reconstructive surgeries were performed in the U.S. Increase in prevalence of breast cancer in Canada has also contributed to the large revenue share of this region.
