Abstracts

Global Nut Products Market is valued approximately at USD 1.42 billion in 2019 and is anticipated to grow with a healthy growth rate of more than 6.30% over the forecast period 2020-2027. The increasing preference of consumers towards gluten-free and plant-based products, increasing health awareness, rising disposable income, increase in nut based-based derivatives and increasing investments by market players in the form of acquisition are the reasons contributing to the growth of nut products market. For Instance: in December 2019, Hughson Nut (California) was acquired by Olam International Limited (Singapore), this acquisition helped the company in expanding nut products capacity, and it became easy for company to satisfy the need in and outside US. However, it is not easy to maintain the inventory of nut as a raw material for small and medium-scale manufacturers because it requires carefully planned inventory management that impedes the growth of the market over the forecast period of 2020-2027. Also, nut-based flour, butter, fillings and paste are increasingly utilized across various applications such as bakery and confectionery which is likely to increase the market growth during the forecast period.

The regional analysis of global Nut Products market is considered for the key regions

such as Asia Pacific, North America, Europe, Latin America and Rest of the World. Asia Pacific is the leading/significant region across the world in terms of market share owing to high production of nuts in countries like India and China that allows export of nuts in the entire world. Whereas, Europe is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2020-2027. Factors such as rise in nut product consumption due to high demand for natural and low-sugar ingredients and food products would create lucrative growth prospects for the Nut Products market across Asia-Pacific region.
