Abstracts

Global Nutraceutical Ingredients Market is valued at approximately USD 173.45 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 7% over the forecast period 2022-2028. Nutraceutical Ingredients are gaining popularity among the millennials as they have become an integral part of many consumers' daily routines all across the world. The supplements, foods, and beverages containing these ingredients are widely preferred due to consumers' focus on natural remedies and nutrition as compared to synthetic materials. The increasing prevalence of chronic diseases such as blood pressure, diabetes, and others is one of the major factors driving the market growth. For instance, according to the World Health Organization, worldwide approximately 422 million people are suffering from diabetes whereas approximately 1.13 billion people are suffering from blood-pressure, which in-turn is the main cause of hyper-tension. Furthermore, the total market is also expected to be driven by the increase in demand for dietary supplements. According to Statista, the market size of dietary supplements is projected to reach USD 308 Billion in 2028 from USD 175 Billion in 2019. Also, rising participation in sports activities, increasing disposable income, and new product launches are likely to increase the market growth during the forecast period. However, availability of low-quality and counterfeit Nutraceutical Ingredients impedes the growth of the market over the forecast period of 2022-2028.

The key regions considered for the Global Nutraceutical Ingredients Market study

include Asia Pacific, North America, Europe, Latin America, and Rest of the World.
