Abstracts

Global Off-Road Vehicles Market is valued approximately USD 14 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 4.12% over the forecast period 2021-2027. An off-road vehicle is a sort of mobility solution that can go on both public highways and difficult terrain. Open treads, wide tyre with deep treads, and a flexible suspension are all features of off-road vehicles. To meet operating requirements, the majority of off-road vehicles are equipped with four-wheel drive (4WD) or all-wheel drive (AWD). Moreover, Off-road vehicles also have a wide range of uses in the areas of cargo transport, agricultural applications, and passenger transportation. Electric-powered off-road vehicles have gained popularity in recent years due to their fuel-efficiency and great noise reduction. For better safety, off-road vehicle use is governed by strict government laws and regulations. The off-road vehicle market is anticipated to develop due to factors such as the growing popularity of leisure activities and adventure sports, as well as the increased penetration of AWD and 4WD cars. However, high maintenance costs of off-road vehicles and a prohibition on ATV and UTV driving in wildlife areas owing to terrain damage limit market development. On the other hand, the development of electric off-road vehicles and the expansion of dealer networks to ensure effective product reach are expected to provide attractive growth possibilities for market participants. For instance, Yamaha introduced their latest ATV models, the Grizzly 2021 and Kodiak 700 and 450 variants, in September 2020. The Grizzly 90 in Armor Gray (USD 3,099 MSRP), Raptor 90 in Team Yamaha Blue

and White (USD 3,099 MSRP), and YFZ50 in Team Yamaha Blue and White are among the new models for 2021. (USD 2,199 MSRP).

The main regions of Asia Pacific, North America, Europe, Latin America, and the Rest of the World are included in the geographical analysis of the worldwide Off-Road Vehicles market. Along with rising consumer demand in the area, North America is anticipated to remain the largest market for off-road vehicles, followed by Europe. The off-road vehicle market in Asia-Pacific is anticipated to develop at the quickest rate, owing to high adoption rates and a rising automotive industry, which would lead to increasing manufacturing of off-road vehicles, particularly in China and India.
