Abstracts

Global Office-based Labs Market is valued at approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2028. Office-based labs (OBLs) are also known as office interventional suites. These labs are opened by interventional radiologists, vascular surgeons, and other physicians with the objective of offering a delivery-care model, which is patient-centered in an office-based setting. The increasing incidences of target diseases, growing preference for minimally invasive procedures, and rising expenditure on healthcare activities are several factors fostering market growth across the globe. For instance, according to Statista, the minimally invasive surgery market worldwide accounted for nearly USD 20.5 billion in 2019. Also, the amount is projected to grow and is likely to reach around USD 44.04 billion by 2030. Consequentially, the development of the minimally invasive surgery sector is positively influencing the growth of the global Office-based Labs Market in the impending years. However, high-risk options for severe cases and a lack of technical training for the MIS procedure impede the growth of the market over the forecast period of 2022-2028. Also, rising approval of endovascular procedures in office-based labs and flexibility for physicians to convert to OBLs are anticipated to act as catalyzing factors for the market demand during the

forecast period.

The key regions considered for the global Office-based Labs Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to the presence of huge patient pool and rising inclination toward various treatment options in outpatient settings. Whereas, Asia-Pacific is anticipated to exhibit the highest CAGR over the forecast period 2022-2028. Factors such as the high prevalence of various vascular diseases, as well as growing awareness about the different benefits of office-based labs, would create lucrative growth prospects for the Office-based Labs Market across the Asia-Pacific region.
