Abstracts

Global Office and Contact Center Headset Market is valued at approximately XX in 2021 and is anticipated to grow with a healthy growth rate of more than xx% over the forecast period 2022-2028. In call centres and offices, the use of headsets is expanding, which is boosting worker productivity and efficiency. It enables users to multitask while taking calls or listening to music and also makes it easier for them to maintain their hands free while performing other tasks, like taking notes or working on other office tasks, without being interrupted. During the forecast period, there will likely be an increase in demand for headsets due to the replacement of old, antiquated models with more modern ones. Because of the changing corporate climate and government engagement, the expansion of business process outsourcing and call centres has raised the demand for the professional headphone market in offices and contact centres. For example, Sonova Holding AG, a leading producer of hearing solutions, has agreed to purchase Sennheiser electronic GmbH & Co. KG's Consumer Division in May 2021. (Sennheiser). As a result of the acquisition, Sonova will be able to expand its appealing product range, seize development opportunities, particularly in the fast-growing market for true wireless headsets and the new field of speech-enhanced hearables, and expand its channel presence and customer base. The market is becoming more competitive, with various corporate communications endpoints providers either including professional headset launches in their portfolios or introducing new headset models. Headset manufacturers are already releasing an expanding range of UC headsets with increased audio bandwidth, greater noise reduction, and speech recognition capabilities. Poly, for example, has added the Voyager 4300 UC Series to its award-winning Voyager wireless Bluetooth headset range in August 2021. The

Voyager 4300 UC Series, intended for today's working environment, keeps employees connected and productive at home or at work. Furthermore, call centres are mostly opting for UC and business headsets due to the benefits they bring to their company processes, such as increased employee productivity and effective customer communication. However, decreased use of desktop phones and supply problems is expected to hamper the market growth.

The key regions considered for the global Office and Contact Center Headset market study include Asia Pacific, North America, Europe, Latin America, and Rest of the World. Major market growth is anticipated in Asia-Pacific. The market for wireless audio devices is primarily driven by high semiconductor spending for wireless devices, growing mobility needs, technological advancements, and the introduction of new gadgets. Additionally, the Asia-Pacific consumer electronics market is expanding due to the region's well-established consumer electronics sector as well as the rising middle class in developing countries like China, India, and Japan.

Major market players included in this report are:

Samsung Electronics Co. Limited
LG Electronics
Panasonic Corporation
Sennheiser electronic GmbH & Co. KG
Audio-Technica Corporation
Sony Corporation
Plantronics, Inc.
Jabra

The objective of the study is to define market sizes of different segments & countries in recent years and to forecast the values to the coming eight years. The report is designed to incorporate both qualitative and quantitative aspects of the industry within each of the regions and countries involved in the study. Furthermore, the report also caters the detailed information about the crucial aspects such as driving factors & challenges which will define the future growth of the market. Additionally, the report shall also incorporate available opportunities in micro markets for stakeholders to invest along with the detailed analysis of competitive landscape and product offerings of key players. The detailed segments and sub-segment of the market are explained below:
