Global Offshore AUV and ROV Market is valued approximately USD 4.2 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 18 % over the forecast period 2021-2027. The off shore autonomous underwater vehicle (AUV) is an unmanned, self-propelled, untethered underwater vehicle that is used to carry out simple activities with little or no human supervision. AUV's are often used as survey platforms to map out the seafloor or characterize the physical, chemical, or biological properties of the water being tested. , On the other hand, the remotely offshore operated vehicles (ROVs) are underwater robots utilized in science, offshore oil industries, entertainment, and military. Their primary role is to interact with the environment to operate under the water in several ways. Underwater surveys and increasing in the demand for oil & gas, has led the adoption of Offshore AUV and ROV across the forecast period.
