Abstracts

Global Offshore Drilling Market is valued at approximately USD 102.59 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 7.2 % over the forecast period 2021-2027. Offshore drilling is a mechanical process that is performed to discover the extracted petroleum that is found in the form of rock beneath the seabed. In general, it is the drilling activities on the continental shelf, or drilling in lakes, inshore waters, and inland seas. The growing reach to deep water and ultra-deep water, rising investments in offshore discoveries, rapid technological developments, as well as the execution of stringent onshore drilling projects by the regulatory bodies, is amplifying the demand for offshore drilling activities. For instance, in January 2020, Transocean received a large number of offshore drilling contracts worth USD 352.9 million subsequent to the company's October 2019 report. As per the company statement, the demand for offshore drilling in ultra-deep water exhibits a huge growth prospect in the near future. However, the capital intensive, and collision of oil price impede the growth of the market over the forecast period of 2021-2027. Also, the rising focus on arctic discoveries tied with the growing investments in exploration & production (E&P) activities are likely to increase the market growth during the forecast period.

The regional analysis of the global Offshore Drilling market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World. Asia-Pacific is the leading region across the world in terms of market share owing to the increasing number of offshore activities majorly in regions like China, Thailand, India, Indonesia and Australia. Whereas, Middle East and Africa are also

anticipated to exhibit a considerable growth rate over the forecast period 2021-2027. Factors such as the presence of the world's largest gas reserve and the discoveries of oil and gas reserves across the Eastern Mediterranean Sea would create lucrative growth prospects for the Offshore Drilling market across the MEA region.
