## **Abstracts**

Global Oil Pipeline Infrastructure Market is valued approximately at USD XX billion in 2020 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2021-2027. Growing refurbishment projects to replace ageing infrastructure, rising number of vehicles on the road increasing oil demand, and growing investment by oil rich countries such as Saudi Arabia for export of oil are factors growing the demand for oil pipeline infrastructure. For instance, in April 2018, McDermott International announced its air and saturation dive for its offshore pipeline construction project across South Africa which also involves the replacement of various pipeline assets. Furthermore, technological advancements and rising determination of undiscovered oil reserves around the globe is expected to fuel the demand in the coming years. Such as, in the United Kingdom Continental Shelf (UKCS), there are around 350 undeveloped discoveries that are estimated to contain 3.2 billion barrels of oil equivalent (bboe). However, stringent government regulations and volatile oil prices may hamper the growth during forecast period.

North America is dominating the world market among Asia Pacific, North America, Europe, Latin America, and Rest of the World. Rapid discoveries of new oil fields couple with technological advancements are growing the North America market. Whereas, Asia Pacific is expected to grow with the highest growth rate, owing to growing energy demand in countries such as India and China and growing number of pipeline additions

in the region.
