## **Abstracts**

Global online gambling Market is valued approximately at USD 59.88 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 11.5% over the forecast period 2021-2027. Online gambling means indulging in betting practices such as casinos and sports over the internet. These bets are placed using credit card accounts and thereby the money gets debited or credited depending upon the wins or losses. There are different types of online gambling games such as bingo, poker, lotteries, cricket, and many more. The major factor adding to the growth of online gambling is that it provides the convenience of cashless transactions which removes the hassle of carrying cash whenever betting. In 2018, United States Supreme Court legalized sports betting which will further support the market's growth. Pandemic had a positive impact on the industry because people are shifting more towards online platforms. However, stringent rules related to gambling hinders the growth of the industry. States including Tamil Nadu prohibited online gambling games and also imposed a fine of rupee 5000 on those playing them. Also, lack of security and authenticity slows down the growth because it is not regulated by any authority. This increases the possibilities of hacking the apps and manipulating the signals through fake apps. But, technologies such as virtual reality and blockchain gives the opportunity for development in the industry. Blockchain will allow the manufacturer to have a more transparency in the gambling activities and AR will enable to give the users enhanced experience.

The Key regions considered for the regional analysis of Global Online Gambling Market are Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is the fastest growing region. There are three states namely Nevada, Pennsylvania, and New Jersey where online gambling is legal and regulated in the US. Also, the growing use of internet services and relaxation in regulations is increasing the

growth of the sector in the Asia Pacific region. Macau and Hong Kong are the most prominent revenue generating countries in the region.
