Abstracts

Global open source services market is valued approximately at USD 18.4 billion in 2020 and is anticipated to grow with a healthy growth rate of about 18.2% over the forecast period 2021-2027. Open source services offerings deals with open source technologies through the whole technology spectrum such as data integration software to servers and critical business solutions including customer relationship management and Big Data. Open source services are being majorly used for data integration, business process management, web content management, cloud management, and project management. The global open source services market is being driven by increasing trend of open standards that support collaborative development and community and increasing adoption of open source cloud technology. Furthermore, rising inclination to extend the technical support and maintenance will provide new opportunities for the global open source services industry. Market players across the globe are strengthening their presence in the market through different strategic initiatives. For instance, in 2021, Cisco Systems launched Cloud-Native SD-WAN (CN-WAN) open source project to demonstrate automated mapping of Kubernetes applications with result that applications perform better over the WAN. Also, in 2020, Accenture and Fujitsu collaborated to work on Hyperledger Cactus project by Hyperledger which is an open source collaborative effort developed to advance cross - industry blockchain technologies, and hosted by the Linux Foundation. Such strategic initiatives taken by
