Abstracts

Global Oral Solid Dosage Contract Manufacturing Market is valued at approximately USDXX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2028. Oral solid dosage (OSD) products are manufactured in various shapes, and with different facility designs and production techniques. Oral solid dosage is designed in various forms such as tablets, capsules, powders, and others. The rising technological advancements in oral solid dosage forms, growing demand for novel therapies, and increasing R&D investments by CMOs & CDMOs are the primary factors stimulating the growth of the global market. For instance, in 2021, the FDA approved 50 novel drugs, 22 of which were tablets or capsules in the United States. Likewise, as per an article published in Pharma Manufacturing, tablets are highly preferred as a solid dosage form, which is estimated to have sales of above USD 500,000 by 2027. In 2018, there were around 7 capsules of solid dose and 24 solid dose tablets forms among the 59 new molecular entities approved. Accordingly, rising FDA approvals for solid dosages are fueling the demand for Oral Solid Dosage Contract Manufacturing, which, in turn, augments the market growth across the globe. However, strict approval criteria by regulatory authorities and a dearth of experienced technical staff, as well as physical capability impede the growth of the market over the forecast period of 2022-2028. Also, the growing health awareness and substantial development of the pharmaceutical industry are anticipated to act as catalyzing factors for the market demand during the forecast period.

The key regions considered for the global Oral Solid Dosage Contract Manufacturing

Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. Asia Pacific is the leading region across the world in terms of market share owing to the growing production of generic drugs and rapid advancement of drug delivery technology. Whereas, North America is anticipated to exhibit a considerable growth rate over the forecast period 2022-2028. Factors such as the increasing number of drug approval by FDA, as well as growing investment in the R&D activities, would create lucrative growth prospects for the Oral Solid Dosage Contract Manufacturing Market across the North American region.
