Abstracts

Global Organic Dyes Market is valued approximately USD 3.3 billion in 2019 and is anticipated to grow with a healthy growth rate of more than 5.8 % over the forecast period 2020-2027. Organic Dyes is used to impart colour to textiles, paper, leather, and other materials. It is done in such a way that the colouring is not easily altered by washing, heat, light, or other factors. They are used in many industrial processes such as fabric, woven, leather, textile, pulp and paper, tanneries, cosmetic, pharmaceuticals, food processing, agricultural research, electroplating, and distillers. Colour has always fascinated humans, for both aesthetic and social reasons. There are thousands of color variants available in the market according to the consumer demands and to influence them. Accordingly, environmentally friendly products along with the consumer spending are expected to drive the market growth. Further, technological development, increased printing ink demand, increase in manufacturing industries has led the adoption of Organic Dyes across the forecast period. For Instance: In 2020, Huntsman Textile Effects and Bao Minh Textile partnered to produce fabric for medical gowns. In 2016, Eckart launched its new pigment portfolio and a new “illoom” concept at the packaging innovations exhibitions in London. In 2016, Huntsman launched a new titanium dioxide pigment, HOMBITAN AFDC 101 for the cosmetic application. However, high cost of natural dyes is high as compared to that of inorganic dyes due to limitation of raw materials impedes the growth of the market over the forecast period of 2020-2027. Also, with the increase in investments in research & development activities and stringent government environmental regulations, the adoption & demand for Organic Dyes is likely to increase.

The regional analysis of global Organic Dyes market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. Asia-Pacific is the leading/significant region across the world in terms of market share owing to large production and increasing quality & performance in the traditional products which makes them demanded internationally. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2020-2027. Factors such as rising disposable income, increase in construction sector and Asia being manufacturing hub would create lucrative growth prospects for the Organic Dyes market across Asia-Pacific region.
