## **Abstracts**

Global Organic Emulsifier Market is valued approximately at USD 0.68 Billion in 2020 and is anticipated to grow with a healthy growth rate of more than 7.50% over the forecast period 2021-2027. Organic Emulsifier is an ingredient that is extracted from natural sources such as plants. It is used in food products to improve the texture, taste and stability of food products. The global Organic Emulsifier market is being driven by rapid growth in the consumer awareness about the healthy ingredients used in the food products. Another important driving factor for the growth of market is the continuous introduction of the food products with the organic ingredients for the health conscious consumers. For instance, in March 2021, Ingredion launched natural emulsifier made from chickpeas, as a replacement for eggs and can be used in dressings and sauces. However, rise in the health concerns due to side effects and rigorous regulations regarding quality standards may impede market growth over the forecast period of 2021-2027. Also, with the rising health conscious consumers and introduction of new companies in the market, the adoption & demand for Organic Emulsifier is likely to increase.

The major regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World have been considered for the regional analysis of the global Organic Emulsifier Market. Asia Pacific is the leading region across the world in terms of market

share due to increase in the disposable income and enhanced standards of living which have stimulated product demand in the region.
