Abstracts

Global Organic Fruit Extracts Market is valued approximately at USD xx Billion in 2020 and is anticipated to grow with a healthy growth rate of more than xx% over the forecast period 2021-2027. Organic Fruit Extracts contain essential rich nutrients, amino acids and vitamins. The global Organic Fruit Extracts market is being driven by rise in consumption of organic products and rising health awareness. Another driving factor is the increase in product launches in which Organic Fruit Extracts are included to boost the market growth. For instance: in 2021, L'Occitane's launched verbena perfume products enriched with extracts of organic verbena and citrus fruits. Also, in 2021, Genius Juice Company launched new protein smoothie range which includes monk fruit extract. Furthermore, positive influence of social media, the rising awareness about food adulteration, and rising prevalence of chronic diseases, will provide new opportunities for the global Organic Fruit Extracts industry. However, high prices of these products and lack of awareness among customers regarding the benefits of its consumption may impede market growth over the forecast period of 2021-2027.

The key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World are considered for the regional analysis of the global Organic Fruit Extracts Market. North America is the leading region across the world in terms of market share due to growing health awareness and presence of large companies in the region. Whereas Europe is anticipated to exhibit the highest CAGR over the forecast period 2021-2027 due to the shifting consumer inclination for organic food products, high availability of end-users and rising health conscious consumers in the region.
