Abstracts

Global Organic Pork Market is valued at approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2029. Organic Pork is sourced from pigs that are raised organically without the use of any chemical-based feed additives and antibiotics. Moreover, Pigs are raised in favorable living conditions accommodating their natural behaviors, and are fed only natural foods. Additionally, food processors source Organic pork from pigs raised on a certified organic farm that follows organic meat guidelines and requirements. The increasing demand for organic meat and growing consumption of Pork are key factors accelerating the market growth.

The rising consumer preference for organic meat is contributing towards the growth of the Global Organic Pork Market. For instance – as per Statista – in 2021, the global organic meat market was valued at USD 15.44 billion, and the market is projected to grow to USD 23.88 billion by 2026. Moreover, the rising consumption of Pork is another factor driving the market space. For instance, according to National Pork Board – in 2021, globally pork was the most widely consumed protein with a consumption of around 238.4 billion pounds. In addition, in 2021, U.S. pork exports crossed USD 8.1 billion in value. Also, rise in awareness towards ill effects of food additives & antibiotics and growing emergence of direct-to-consumer sales would create a lucrative growth prospectus for the market over the forecast period. However, the high cost associated with Organic Pork and limited availability stifle market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Organic Pork Market study include Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America dominated the market in terms of revenue, owing to the increasing demand for organic meat and rising export of pork in the region. Whereas Asia Pacific is expected to grow with the highest CAGR during the forecast period, owing to factors such as rising awareness towards consumption of organic meat and increasing number of bans on antibiotic colistin which are used in meat and poultry industry & growing penetration of online distribution channels in the region.
