Global Orthopedic Prosthetics Market is valued approximately USD XXX million in 2019 and is anticipated to grow with a healthy growth rate of more than 4.52% over the forecast period 2020-2027. Orthopedic prosthetics deals with the identification, designing, and manufacturing of custom-made artificial limbs in a patient. The devices are required to be of high strength and low weight. Hence, they use materials such as EVA (Ethylene-vinyl acetate), thermoplastics, carbon fiber, metals, or a combination of these for production. These devices are used to replace a damaged or missing body part caused by trauma, disease, or other medical conditions. Increasing number of trauma cases and accidental injuries drives the market growth. As per The National UAE, 3712 serious road accidents were recorded in 2018. Similarly, as per the Ministry of Transport, in Saudi Arabia, the number of accidents in 2017 as per the Ministry of Transport, were 17,632 resulting in 14,481 injuries and the 2331 deaths. Further, the number of accidents in the country in 2018 accounted to 13,221 resulting in 10,755 injuries and 1560 deaths. Further, rising prevalence of osteosarcoma and growing demand for Lower Extremity prosthetics owing to increasing ankle and fleet related disorders boosts the market growth. In recent years, the market for orthopedic prosthetics has witnessed significant developments in designing and production technologies which catalyzes the market growth. As in July 2018, Blatchford launched a novel sandal toe footshell for its products like Elan, Linx Echelon VAC. Also, in May

2018, OT world introduced Ossur Form Fit Pro Line of the 3D knitted supports to gain market. However, high costs impedes the growth of the market over the forecast period of 2020-2027. Although, development of new technologies presents a lucrative opportunity for the market.

The regional analysis of global Orthopedic Prosthetics market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading/significant region across the world in terms of market share owing to the early adoption of technology and well established infrastructure.
