Global Osmometers Market is valued at approximately USD 88.70 million in 2021 and is anticipated to grow with a healthy growth rate of more than 4.03% over the forecast period 2022-2029. An osmometer is a device for measuring the osmotic pressure of a solution, colloid, or compound. This device is also gaining traction in measuring salts or sugars in urine solutions. Factors such as the growing adoption of osmometers in clinical, and biopharmaceutical labs, coupled with the rising incidences of chronic diseases and electrolyte disorders are driving the global market growth.

According to the National Library of Medicine (NLM), hyponatremia is considered the major prevalent electrolyte disorder in January 2022, which accounted for 20.0% to 35.0% among hospitalized patients. Thereby, the rising cases of hyponatremia among population are propelling the demand for osmometers, which is impelling the market growth around the world. Moreover, rising introduction to technologically advanced products, as well as increasing adoption of automation in clinical laboratory settings are creating lucrative opportunities the market growth over the forecasting years. However, complications associated with various techniques of osmometry and dearth of skilled professionals stifle market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Osmometers Market study include Asia

Pacific, North America, Europe, Latin America, and the Rest of the World. North America dominated the market in terms of revenue, owing to the favorable reimbursement environment and growing presence of well-established market players.
