## **Abstracts**

Global Outdoor Heating Market is valued at approximately USD 1.16 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 5.6% over the forecast period 2022-2029. Outdoor heating device emits radiant heat, which is absorbed by nearby objects and people to increase the temperature. Fire pits, electric ceramic or quartz lights, and gas patio heaters are a few examples of the numerous kinds of outdoor heating equipment. These can be set up in a variety of ways, such as tabletop, hanging, or wall-mounted. The Outdoor Heating market is expanding because of factors such as increasing popularity of outdoor entertaining activities and increasing demand for electric outdoor heaters.

Global consumer expenditure on outdoor activities like fishing and eating al fresco is rising, which aids the market expansion. The Outdoor Industry Association report states that in 2021, North American spending on outdoor leisure activities surpassed USD 646 billion. According to this estimate, the U.S. has spent 1.8% of global outdoor recreation spending in 2020, or USD 374.3 billion. Thus, rising outdoor activities are catering to the market growth. Along with these, according to a survey by the National Restaurant Association, about 50% of restaurants intended to expand outdoors with patio heaters in

2021. Thus, rising adoption of heaters is catering to the market growth. In addition, rising demand for environment-friendly Outdoor Heaters is creating lucrative growth opportunities in the market. However, rising environmental concerns and high operational costs of Electric Outdoor Heaters may halt market growth.

The key regions considered for the Global Outdoor Heating Market study include Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America dominated the market in terms of revenue, owing to the dominance of rising outdoor sports activities, and rising construction activities. Whereas Asia Pacific is expected to grow with the highest CAGR during the forecast period, owing to factors such as rising product development activities, and rising outdoor activities.
