Abstracts

Global Outdoor Kitchen Market is valued at approximately USD 19.64 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 8.3% over the forecast period 2022-2029. An outdoor kitchen is a place outside of the home where activities such as cooking entertainment, and meals are prepared while enjoying the open air. The increasing disposable income, rising inclination toward outdoor living areas activities, coupled with the increasing influence of social media among population is attributing towards the market growth across the globe.

According to Federal Statistical Office, in 2019, disposable personal income in Germany accounted for USD 516.23 billion (EUR 504.54 billion) and the amount increased and reached USD 544.47 billion (EUR 532.14 billion) in the year 2022. Therefore, the rising purchasing capacity of population is accelerating the market growth globally. The increasing popularity of outdoor food events, as well as surging number of hotels and restaurants, are excelling the market growth over the forecasting years. However, high cost of outdoor kitchen set-up stifles market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Outdoor Kitchen Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America dominated the space in terms of revenue, owing to the growing construction of

outdoor kitchens and increase in income levels of the population. Whereas, the Asia Pacific is expected to grow significantly during the forecast period. Factors such as rising trend of outdoor living spaces, as well as surging demand for innovative and modern kitchens are burgeoning the market growth in the forecasting years.
