## **Abstracts**

Global Outpatient Rehabilitation Centers Market is valued at approximately USD 79.8 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 7.09% over the forecast period 2022-2029. Outpatient rehabilitation centers are a type of healthcare service that provides treatment to those people who have cognitive limitations due to acute or chronic complications, neurological disorders, and orthopedic problems. These rehabilitation centers provide low-cost treatment to patients. Factors such as increasing spending on healthcare services, growing aging population, and rising adoption of a sedentary lifestyle are burgeoning the market demand across the globe.

According to the Department of Economic and Social Affairs, in 2019, the number of people aged 65 and more globally was recorded at 703 million. Also, the number of elderly people is expected to increase to 1.5 billion by 2050. Accordingly, the rising geriatric people are exhibiting a positive influence on the market as they require suitable and timely treatment, which, in turn, augments the market growth. In addition, the rising penetration of emerging technologies by outpatient rehabilitation centers and untapped opportunities in underdeveloped and developing countries are presenting various lucrative prospects for the growth of the market in the forthcoming years. However, a lack of awareness about outpatient rehabilitation centers and a dearth of skilled

professionals are hindering market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Outpatient Rehabilitation Centers Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America dominated the space in terms of revenue, owing to the increasing expenditure on healthcare services and rising number of outpatient rehabilitation centers. Whereas, Asia Pacific is expected to grow significantly during the forecast period. Factors such as availability of favorable reimbursement policies, as well as rising inclination towards healthcare, are burgeoning the market growth in the forecasting years.
