## **Abstracts**

Global Oxygen Therapy Market is valued at approximately USD XX Billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Oxygen Therapy is preferred by patients as a treatment option for those who are unable to get enough oxygen in their bodies. The increasing number of cases of asthma and other respiratory issues is one of the major factors driving market growth as Oxygen Therapy is used to treat asthma. According to the Centers for Disease Control and Prevention, the mortality rate due to asthma in the US has increased from 9.9 Death Rate per Million in 2017 to 10.7 Death Rate per Million in 2019. Furthermore, the total market is also expected to be driven by the rising demand for home healthcare. Also, introduction of innovative solutions and rise in utilization of telemonitoring and telemedicine are likely to increase the market growth during the forecast period. However, strict regulatory guidelines leading to delays in product approval impede the growth of the market over the forecast period of 2022-2028.
